Education

Georgia Institute of Technology

December 2026

B.S. in Computer Science | GPA: 3.71

Relevant Courses: Computer Architecture, MySQL, Networking, Algorithms, Software Design

Skills & Certifications

Languages (by proficiency): JavaScript, TypeScript, HTML/CSS, SQL, C#, PHP, Python

Frameworks & Tools: Angular, Next.js, .NET MVC, GitHub, AWS (EC2, RDS), Docker

Certifications: AWS Certified Cloud Practitioner, Entry Level JavaScript Programmer, Eagle Scout

Experience

Tyler Technologies | Lawrenceville, GA

May 2026 - Aug 2026

Software Engineer Intern

- Resolved ADA compliance issues, bugs, and feature requests across multiple teams using Angular, TypeScript, HTML, and CSS.
- Accelerated ticket resolution and optimized development workflows by leveraging AI coding assistants, including Claude and Codex.
- Achieved and maintained 100% code coverage by authoring comprehensive unit tests for all assigned tickets.
- Collaborated directly with QA engineers and Product Managers to define requirements and ensure accurate initial ticket resolutions.

CompuScholar | Canton, GA

May 2025 - Aug 2025

Software Engineer Intern

- Led development of a Production Report Engine for real-time data visualization using AWS EC2, AWS RDS, SQL, PHP, and JavaScript.
- Implemented a Python-based RAG system prototype using Qdrant and the OpenAI API to generate content from curricular text chunks.

AppVault | Alpharetta, GA

May 2024 - Aug 2024

Software Engineer Intern

- Developed production code using .NET Core MVC, C#, and MySQL, and built internal tools with Electron, JavaScript, and HTML.
- Automated code flows using Microsoft Power Automate and created custom AI agents with Microsoft AI Builder.

Projects

- **NorthStar:** Built MVP for an AI startup, automating end-user documentation using Docker, Gemini, and Playwright.
- **CodeRank:** Built a custom PageRank algorithm tuned to rank code snippets rather than webpages, integrating BM25 and FQN heuristics into Zoekt search results.
- **Spotify API App:** Developed an Android application utilizing Spotify's API flow.
